

15th Annual

Cybersecurity Competition Sponsorship Opportunities

Over **one million** students in Southern California between 6th grade and community college.

Connect with over 50 school districts in Southern California.

As a sponsor, you can help students in Imperial, Orange, Riverside, San Bernardino and San Diego Counties learn about an exciting career in STEM: Cybersecurity! By participating, the students are exposed, educated and enlightened with opportunities in software, IT and cybersecurity careers.

Influence & engage with the brightest young minds.

In the last 14 years, the SoCal Cyber Cup Challenge has conducted annual cybersecurity training and competition to help students to further their education in STEM. In a hands-on, uniquely designed educational experience for 2024, teams will compete using National Cyber League's (NCL) top level cybersecurity training platform, powered by Cyber Skyline.

Educate minds for vital careers in defense of the US.

The SoCal Cyber Cup provides an opportunity to ALL students in Southern California to be exposed, educated and enlightened! Your sponsorship prepares students for cybersecurity advanced education and/or occupations that protect the United States military, business and civilian critical infrastructure.

Give back and grow the industry, as well as our youth.

Free to all participants! Please consider sponsoring this amazing opportunity, which is funded 100% by gracious sponsorships and grants. It is free of cost, regardless of schooling choice or economic status, with opportunities in software, IT and cybersecurity careers. Please consider helping us to provide this free opportunity by gifting SoCal Cyber Cup with a sponsorship and/or grant.
