# **The A. Bryan Lasswell Award for Fleet Support**

In 1942, Marine Corps Major A. Bryan Lasswell was a cryptologist stationed at Pearl Harbor. He worked day and night to decipher radio traffic of the Japanese Navy, helping to trigger the American victory at Midway Island. He was innovative, believed in excellence, and worked tenaciously to get the job done. Innovation, excellence, and tenacity are the hallmarks of this award.

This award is intended for mid-level technical personnel directly supporting the fleet, the award(s) will be given in two categories.

Technology Innovation Award for the best application of a technology-based solution to a problem facing operating forces

In-Service Engineering Support Award for excellence in technical support to operating forces.
