the fleet to compete, deter and win — tonight***

Battlespace Awareness and Information Operations

VISION

Provide quality Information Warfare capabilities to the Warfighter for a decisive operational advantage

Deliver assured intelligence, meteorology, oceanography, and information operations data, products, and services that provide Information Warfare capabilities to the Fleet

MISSION

- IO | Information Operations
- ISR | Intelligence, Surveillance, and Reconnaissance
- METOC | Meteorology and Oceanography
- CI | Capability Integration

Agile • Integrated • Vital

PMW 120 Overview

Deliver assured intelligence, meteorology, oceanography, and information operations data, products, and services that provide Information Warfare capabilities to the fleet

Information Operation (IO)	Provide timely, relevant, and integrated national and tactical radio frequency signals intelligence information and services enabling Electromagnetic Maneuver Warfare (EMW) and Electronic Attack to protect fleet forces	
Intelligence, Surveillance, and Reconnaissance (ISR)	Provide decision-makers improved situational awareness of the battlespace - on the ground, in the air, and at sea - through integrated acquisition, processing, and dissemination of accurate, relevant, and timely intelligence data	
Meteorology and Oceanography (METOC)	Measure, sense, assess, and exploit the current and predicted states of the physical environment to produce relevant operational information for informing EMW and the strategic triad's ballistic missile submarines (SSBNs)	
Capability Integration (CI)	Integrating IO, ISR, and METOC technologies to enable key operational mission threads: Counter Command, Control, Communications, Computers, Combat Systems, ISR and Targeting (Counter C5-ISRT), Over the Horizon Targeting (OTH-T), and Mission Integration Training	

PMW 120 Acquisition Efforts

IO	ISR	METOC
• Advanced Information Warfare Antennas • Cryptologic Carry-On Program (CCOP) • Distributed Operations (DO) • Horizon • Integrates Communication and Data System (ICADS) • Real Time Spectrum Operations (RTSO) • Ship's Signal Exploitation Equipment (SSEE) • Spectral	• Automatic Identification System (AIS) • Distributed Common Ground System-Navy (DCGS-N) • Intelligence Carry-On Program (ICOP) • Maritime Domain Awareness (MDA) • Maritime Integrated Broadcast System (MIBS) / Joint Tactical Terminal – Maritime (JTT-M), Joint Tactical Terminal (JTT) – Maritime Embedded National Tactical Receiver (JTT-ME) • Remote Sensing Capability Development (RSCD)	• Hazardous Weather Detection and Display Capability (HWDDC) • Littoral Battlespace Sensing-Unmanned Undersea Vehicles (LBS-UUV) • Meteorology and Oceanography Surface-based Atmospheric Sensing Capabilities (METOC SASC) • Naval Integrated METOC System (NIMS) (formerly METMF[R] NEXGEN) • Naval Integrated Tactical Environmental System-Next Generation (NITES-Next) • Tactical Edge Targeting (TET)
